

# WELL CHILD VISITS DURING THE COVID-19 PANDEMIC

Staying home keeps you and your children safe, but well child care and immunizations during the first 24 months of life are essential to long term health.

## Adapting to Unprecedented Times

Physicians are making adjustments to usual clinic operations to best serve you!

## KEEPING PATIENTS SAFE

- Telehealth when possible
- Forms, surveys, and payments handled virtually when possible
- Specific hours and rooms used for well visits and sick visits

## VACCINATIONS

- Postponing immunization visits could increase the risk of a vaccine preventable disease.
- According to CDC guidelines, physicians should prioritize newborn care and vaccination of infants and young children (up to 24 months of age).
